

# Using Search on the N2africa website

---

On the left panel of the N2africa website you find a search option, that enables you to do a side-wide search. By using the News and Output checkboxes you can limit your search to news and/or output items.

The screenshot shows a search interface with the following elements:

- A search box with the text "Search" above it.
- A text input field.
- The text "only in:" to the right of the input field.
- Two checkboxes: one for "News" and one for "Output".
- A "Search" button.

## Below some guidelines to use the search option even more effectively

### AND Searches

To get results that match multiple words, simply type the words that you want to find. This is the default behavior of search. E.g. to search for the combination of *Jager* and *nutrition*, simply type *Jager nutrition* in the search field (the screen shot below shows the search results)

## OR Searches

To search for data that may contain one of a few terms, but not necessarily all of the terms, enter the keyword OR between each search term: *Jager OR nutrition*.

News - 09/25/2014 - 10:14 - 0 attachments

**Note:** The keyword "OR" must be capitalized. The lowercase "or" will be treated as another word to find. Because "or" is smaller than the default search word length (3 characters), search will ignore "or" to create an "AND" search instead.

## Exclusionary Searches

You can even filter for things that don't exist. For example, if you want to find posters that do not have beans as a subject, you need an exclusionary search. To do this use the minus "-" sign. For example *poster -beans* finds all posters with that do not also contain the word "beans".
